

Transforming for tomorrow

ESSAR 

As a leading player in the UK's Oil and Chemical Industry, an apprenticeship with Essar is the ideal way to start your career. We are looking for talented and enthusiastic apprentices to join us at the Stanlow refinery in Ellesmere Port and play a part in building our future.

Essar's continued commitment to becoming the UK's first low carbon refinery follows the launch of Vertex Hydrogen, a new Essar-led joint venture, in which the company will invest £1 billion over the next five years to drive down emissions, including the development of new hydrogen production plants at Stanlow, forming a central part of the HyNet North West decarbonisation cluster.

This year we are recruiting for roles in the Engineering and Manufacturing sector (in partnership with local training provider TTE)
